

Specifications DFMWP06BA

The DFMWP06BA is satellite piezo sounder.

- Providing protection against power failure or wire tampering
- Internal rechargeable battery is built in
- Can be negative or positive triggered by any alarm panels
- Siren cut-off time is adjustable
- Two-minute engineering time is used to prevent the installer from being subjected to a loud piercing alarm during system testing
- Dual LED to indicate the status of battery charging, normal or alarm conditions
- UV treated ABS case

Operating voltage: 10-15VDC

SPL @ 1meter: 100dB

Siren current draw: 80mA

Strobe current draw: 50mA

Internal battery: Ni-MH battery, 6VDC, AAA Rechargeable battery.

Battery lifer: up to 3 years (depends on activation)

Siren Cut-Off time: 2, 5, 10 minutes

Dimension: 200 x 115 x 75mm
