NV780M Series Rain Cover

Installation Manual

Step 1: Remove the original short top screw from the cover and replace with the longer one supplied with the rain cover.

Step 2: Mount the rain cover properly on top of the detector and run the longer screw through the rain cover and detector cover, as shown.

Step 3: Tighten screw.

* Alternatively, you may remove the detector cover, attach the rain cover to it and run the longer screw through both. Attach the captive washer to the screw and place both on the detector and tighten screw.
