IQ CARD-IS
QC0003-840

Specifications QOLQC0003-840

The IQ Card-IS (QOLQC0003-840) allows you to pair up to five image sensors with your IQ Panel. Careful consideration was taken into account by making the image sensor daughter card an add-on panel feature. This stand alone card allows cost savings on the panel so you only pay for this incredible feature on the homes that have image sensors installed.
