## "Stubby" press-fit recessed mount magnetic contact

### Stubby "Press-Fit" contact

---

The Sentrol 1125 series "Stubby" Press-Fit magnetic contacts are a 9 mm switch designed specifically for applications where space is limited. The short length makes it ideal for thin-framed windows and doors where longer units cannot be used. Press fit ribs on the housing make for quick, easy installation.

### Easy installation

---

Switch is hermetically sealed reed switch, which is potted using exclusive polyurethane potting compound into the switch housing. Switch and Alnico V magnet is drill-mounted in wood or aluminum with a suitable adhesive. The switch and magnet housing have three fins to press-fit against the mounting hole.

### Durability and dependability

---

The Sentrol high performance magnetic contacts have been designed to facilitate installation and ensure durability and dependability. Most are conservatively rated at 10,000,000 cycles, guaranteeing a long life. Every reed connection is hand soldered and each magnetic contact is tested before they leave the factory, 100% of the time.

### High quality components and materials

---

Reed legs are plated with rhodium or ruthenium, and hermetically sealed in dry nitrogen. This offers superior protection against sticking and provides a moisture free environment therefore preventing corrosion.

### Details

---

- Quick and easy to install
- Unobtrusive and attractive design
