

1285T-N

Design surface mount contact with screw terminals

Designer styled with screw terminals

The Sentrol 1285T series surface mount magnetic contacts are ideal for residential and commercial applications where terminal connections are preferred. The unit features Sems style terminals that have self-lifting washers and captured screws to prevent the screw from backing out. The screw have combination heads that accept either Phillips or flat blade drivers.

Easy installation

The terminals are angled away from the mounting surface to allow for quick and easy installation. Snap-on covers conceal the terminals and mounting screws for a clean professional appearance.

Durability and dependability

The Sentrol high performance magnetic contacts have been designed to facilitate installation and ensure durability and dependability. Most are conservatively rated at 10,000,000 cycles, guaranteeing a long life. Every reed connection is hand soldered and each magnetic contact is tested before they leave the factory, 100% of the time.

High quality components and materials

Reed legs are plated with rhodium or ruthenium, and hermetically sealed in dry nitrogen. This offers superior protection against sticking and provides a moisture free environment therefore preventing corrosion.

Built-in end of line 3K3 resistors

For seamless connection to the control panel, the 1285T series contains also contacts with built-in end of line resistors. The 2 resistors with a value of 3K3 each are configured in double end of line configuration, allowing a quick, professional and clean installation.

Details

- Ideal for residential and commercial applications
- Angled clamping terminals for fast, easy connection
- Modern, low-profile design
- Convenient surface mounting; Combo head screws for quick termination
- Versions with built-in 3K3 resistors available
